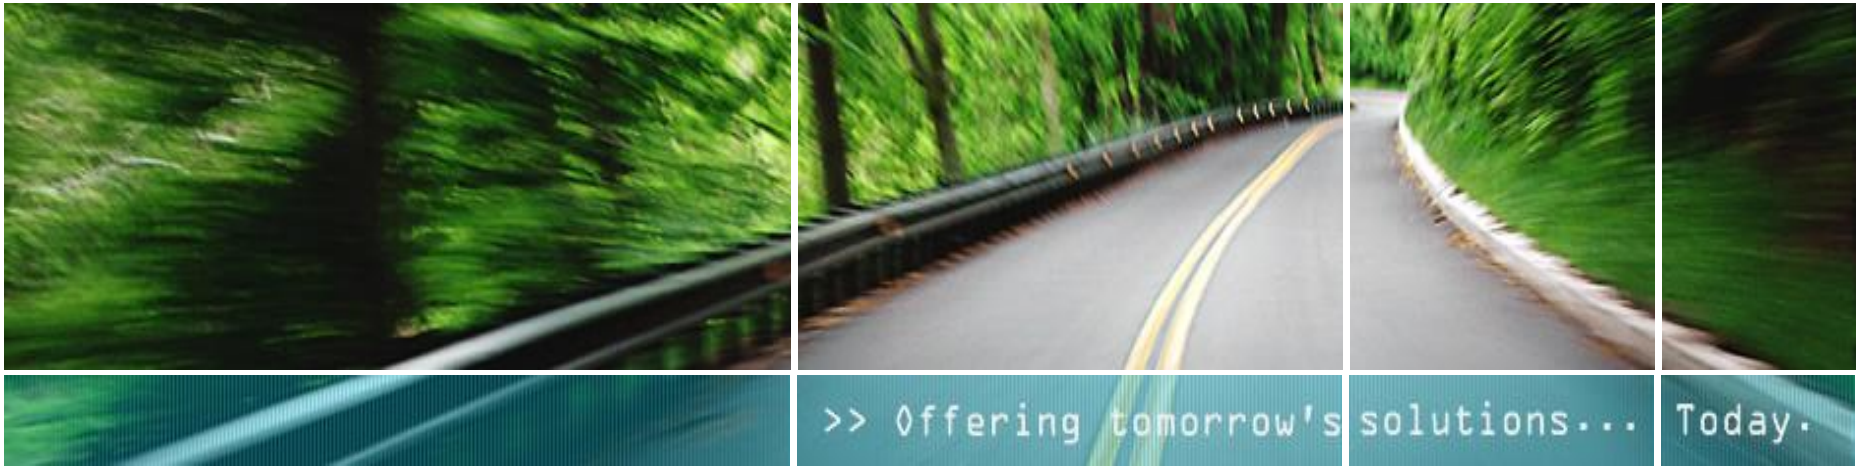
NeoTechID



Introduction to Orion

Fixed Asset Management & Tracking Syste.

orion

About Us

- NeoTechID is a provider of **Business Automation Solutions** based on AIDC technologies such as RFID, bar-code scanning, biometrics, NFC and smart cards.
- NeoTechID was founded in 2009 with a **Vision** of filling the void between the limited capabilities of hardware resellers and the client's requirement of a total solution approach to their needs.
- We offer **Operations Visibility** and **Process Optimization** through innovative use of AIDC technologies to track various assets, integration of AIDC devices with back-end systems and in-house consulting, to maximize business gains
- We aim to become the most preferred and trusted partner for such solutions by providing **Innovative**, **Reliable** and the most **Cost-effective Solutions** based on latest technologies that will result in better ROI for our clients

	Manufacturing	• Warehouse automation and mobility solutions with integration to SAP
	Corporate Offices	• Fixed Asset Management & Tracking • Laptop / Employee Movement Tracking • IP-surveillance, Access Control
	Custom Applications	• School Bus and Students Tracking • Event Delegate Management • Laundry Management etc.

Introduction to ‘orion’

- Assets, whether IT or non-IT, play a pivotal role in every successful business activity
- Lack of an adequate management & tracking system can result in increased capital expenses, productivity loss and can possibly even jeopardize customer service

- Orion helps you track and manage the physical, contractual and financial data associated with the assets in your environment throughout their lifecycle – from receiving through disposal.
- Our solution empowers you with a firm understanding of how your assets are being used, to help identify cost savings, fulfill compliance initiatives, and justify business decisions

‘organizations that systematically manage the life cycle of their assets reduce the cost per asset by almost 30%’

Spreadsheet Shortfalls

- Most organizations track assets through Excel sheets and/or spreadsheets. Whilst spreadsheets seem Cost Effective and Easy to use, the **disadvantages** far outweigh the benefits
  - Constant struggle to manage ever-growing asset portfolio
  - Poor accountability and traceability of their asset base
  - Mismanagement of insurance premiums, poor visibility of expiry dates
  - Time consuming and mundane physical audits
  - Consequent lower productivity of finance teams
